## Student Developer and aspiring Software Engineer

Curious student developer specializing in cloud computing, full-stack engineering, DevOps, and Linux systems. Passionate about building scalable multi-platform applications, performance-focused tooling, and polished developer experiences.

### EDUCATION

#### B.Tech, Computer Science & Engineering

P P Savani University • GPA: 8.19 till now

#### Senior Secondary (XII), CBSE Science Maths

P.P Savani School • GPA: 70.20%

Ankleshwar

#### Secondary (X), CBSE

Swami Vivekanand Academy • GPA: 62.00%

Ankleshwar

### PROJECTS

#### AlgoArena

Competitive coding platform deployed on AWS EC2 with a VS Code-inspired interface, realtime execution, and AI-assisted workflows. Stack: React, Node.js, PostgreSQL, AWS EC2.

#### Nexa-Voice-Assistant

AI voice assistant built to understand spoken commands, respond intelligently, and automate user interactions through voice-driven workflows. Stack: AI/ML, Speech Recognition, Natural Language Processing, Python, IoT.

#### Nexa-ai Chat

Built a unified AI platform enabling users to interact with and compare multiple language models through a single interface. Implemented model orchestration, secure session management, and real-time chat experiences. **Stack:** Next.js, TypeScript, REST APIs, AI Model Integrations.

#### Zero-net-sos

a Flutter-based Android emergency communication app that uses Google's Nearby Connections API to create an offline mesh network. Implemented multi-hop SOS message forwarding, allowing alerts to propagate from device to device until reaching a node with internet access, ensuring emergency communication during cellular network outages.

### SKILLS

**Languages:** Bash, C/C++, Dart, Java, JavaScript, PowerShell, Python

**Frontend and App:** Capacitor, Electron.js, Flutter, Next.js, React, React Native, Three.js

**Backend and Cloud:** AWS, Cloudflare, FastAPI, Flask, Google Cloud, MongoDB, Nginx, Node.js, PostgreSQL, Redis

**Systems and Tools:** CMake, Docker, Git, GitHub Actions, Gradle, Linux, PlatformIO, Postman, Selenium
